

Baltimore Blossoms

Quilting Collection

125 designs total , in 4 different sizes
and 5 different Stipple Frames.

Our newest release in our quilt line is called Baltimore Blossoms and is based on traditional quilt designs. We are giving you two types of designs in this collection. The first type of design is redwork. You get 20 different designs digitized in four different sizes so that no matter what size hoop you have you can enjoy these designs. The second type of design is a fully stitched version of the design in two different sizes. These designs look great on smaller quilts. We have also included five different stipple frames that can be merged with the stitched designs in your embroidery machine for beautiful stippled borders that look like you created them by hand.
