

# Cardinal Crazy Quilt

Designs in 2 sizes/ 25 Designs

Quilting Collection

The Cardinal icons create this beautiful crazy quilt design. We had fun choosing the different lace fabrics for the background giving it a nice texture and the red cardinals against the white lace just pop as they sit perched on the tree branches. Creating Crazy Quilts on an embroidery machine is such an easy technique! The crazy quilt technique has been popular with quilters for years but if aren't a quilter you have probably never tried this amazing technique. If you are a quilter that embroiders as well... you can combine both hobbies into this project. There are a multitude of fabrics to choose from so this was a fun way for us to launch this technique. You create a crazy quilt by mixing different fabrics in a patchwork style. There are a few different crazy quilt designs for embroidery machines but the techniques that were used required a lot of steps that involved folding fabric and it took a long time to complete a block. We used a much simpler technique with these designs. The best part about crazy quilts are when they are complete you have a scene with a large icon in the center instead of just a quilt. Our tutorial contains an extensive guide that will demonstrate how to choose your fabrics, create a block and finish the quilt. In the finished wall hanging notice how the bands of fabric continue through the whole design even though they are done in different hoopings.
