

# *Vintage Collection*

*40 Designs each in 2 sizes*

Welcome to our newest Vintage Collection titled Christmas Cutwork Medallions. There are 8 beautiful cutwork medallions in this collection and each medallion has a different cutwork corner. As an added bonus we re-created all of the cutwork medallions into stitched versions with no cutwork. The stitched designs each have a different corner design as well. There are 2 different sizes of each medallion and the corners have been re-sized and rotated so you don't have to do it! There is a complete tutorial on the following pages that shows you how to create these beautiful designs. We created two different table runners for this collection. We used the cutwork designs and the stitched designs. Both table runners were purchased at a store, this saved a lot of time because we didn't have to construct the project from scratch! You can even use a table runner you already have. We then stitched the designs on high quality linen and applied them to the blank runners.
