

# Creating Crystal Designs

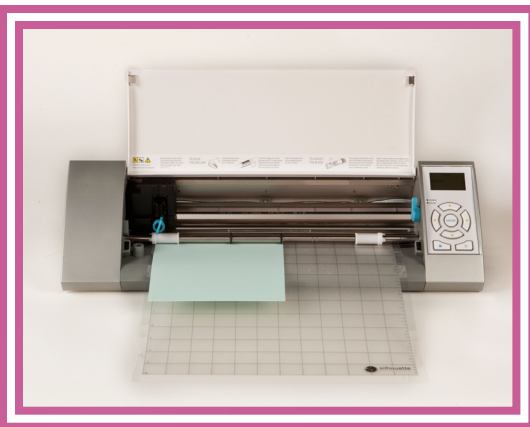

Easily create your own Crystal designs using Artistic Suite V6.0, Artistic Crystals Starter Kit, and Artistic cutter! You are just 5 easy steps away from custom Bling!

## Step 1

Create a crystal design using either Artistic Suite V6.0 or Artistic Crystals V6.0 and send it to your cutter.

Silhouette Cameo

## Step 2

Cut a piece of template material from your Artistic Crystals Starter Kit to the approximate size of the design and feed it through the cutter.

eCraft

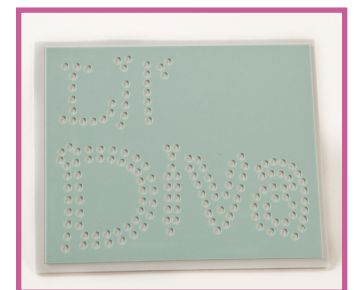

Zing

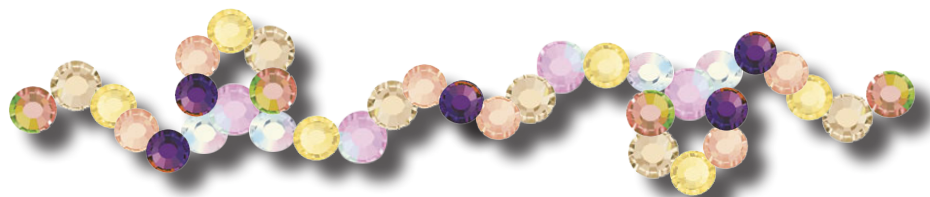

## Step 3

Remove the template material from the cutter and stick it onto a backing board from your Artistic Crystals Starter Kit. Place the template in the plastic case and sprinkle crystals on top of it. Use the brush to move crystals into the template.

## Step 4

Cut a piece of the transfer material to size and remove the backing. Place the transfer material on top of the template and smooth out to ensure all crystals stick to it. Peel the transfer material off of the template and put it in place on your project.

Template with Crystals and Transfer Material

## Step 5

Place your project with the transfer material side up into your Artistic Press. Close press and hold for at least ten seconds. Very carefully peel off transfer material and your crystals are now affixed to your project!
