### Button Indicator Lights

Buttons light up to provide a straight-forward, user-friendly sewing experience.

### Locking Stitch Button

The Locking Stitch Button lets you finish your stitching with an invisible lock stitch. When used with decorative stitches, the machine will complete the stitch pattern before adding the locking stitch.

### Reverse Button

Lets you sew in reverse. If you are in the middle of a decorative stitch it will immediately insert a locking stitch before reversing.

### Start/Stop Button

This convenient button lets you sew without using the foot control. When you press and hold the button, your stitching will slow down for more accurate results. This button is perfect for both the beginning and the ending of a stitch, where you need a little extra control.

### Adjustable Foot Pressure

Select from four foot pressure levels to perfectly accommodate fabrics of different thicknesses.

### One-Hand™ Needle Threader

Thread the needle easily without eye strain using the convenient One-Hand™ Needle Threader. Its advanced design keeps the lever in place for easy one-handed threading.

### One-Step™ Sensor Buttonhole

The DC4030 provides six styles of automatic sensor buttonholes. Drop your button into the sliding gauge and the foot makes a perfectly-sized buttonhole every time.

### Swing Open Face Plate

Removing lint is a cinch with this convenient swing out face plate door.

### Auto-Tension System

Let the automatic thread tension system help you achieve perfect stitch consistency, even over fabrics of different thicknesses.

### Stitch Elongation

Lengthen stitches up to 5x their normal stitch length without losing density: add visual flair to all of your sewing projects. By combining various patterns you can create beautiful, original designs.

## Features

- 30 Built-in Stitches
- 6 one-step™ buttonholes
- Jam-proof horizontal bobbin system
- 4 Easy Convenience Features:
  - Start/Stop
  - Memorized Needle Up/Down
