

ALL ABOUT the monogramming foot "N"

The monogramming foot "N" was designed to sew with the wider-width decorative stitches. The wider cut-out area (2) on the bottom of the foot slides smoothly over the build-up of thread in these type of stitches. By using another foot with the Character/Decorative stitches, the stitch results may not be as precise.

There is a mark (1) located on each side of the foot to use for placement to begin stitching a pattern or use them for turning corners or matching patterns.

Step patterns, beautiful border designs or perfect monograms are just some of the designs you can create using the monogramming foot.
