

# 3N1 Square And Triangle Combo Ruler

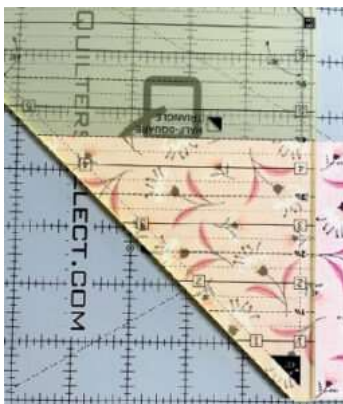

Your ultimate tool for cutting half-square & quarter-square triangle units, plus basic squares up to 6 1/2"! Eliminate the tedious math associated with traditional half and quarter square triangle units. Create complex looking blocks with ease thanks to the Unique Non-Slip Coating for accurate cutting!

## Half-square units:

1. Determine the finished size of the unit. (4" finished half-square units needed)
2. Add 1/2" to the finished size for strip cut size (i.e.: 4 1/2" for 4" finish)
3. Cut fabric strip to determined size.
4. Position top edge of ruler along top edge of strip; cut.

5. Flip ruler 90 degrees: cut.

## To stitch units together

1. Position triangles right sides together, matching blunted corners.
2. Stitch using  $\frac{1}{4}$ " seam allowance.

## Quarter-square units:

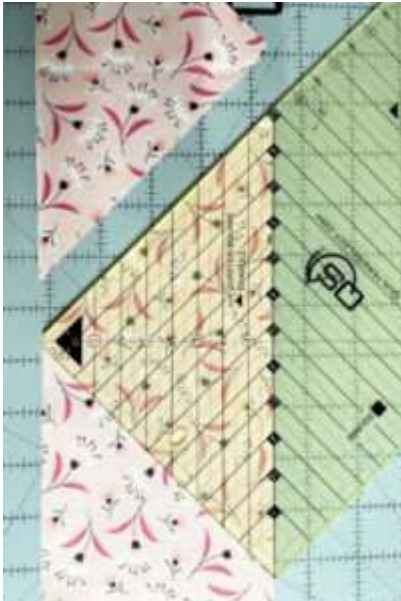

1. Determine the finished size of the unit. (ie: 8" finished quarter square units needed).
2. Divide finished size in half (i.e.: 4"), add  $\frac{1}{2}$ " for strip cut size (4  $\frac{1}{2}$ " for 8" finish).
3. Cut fabric strip to determined size.

4. Position quarter square corner of ruler at the top edge of strip; cut both edges.

5. Flip ruler 90 degrees: cut.

### To stitch units together:

- Position two of the triangles right sides together.
- Stitch using  $\frac{1}{4}$ " seam allowance.
- Repeat for second set of triangles.
- Press seam allowances in opposite directions, position pieced units rights together, nesting the seams.
