ASSEMBLY INSTRUCTIONS

Bandicoot II

ITEM NO.: K8205 Teak
K8211 Ash White

SEW IN COMFORT. SEW LONGER.™

Read the instructions carefully before starting. Please open and inspect the contents of boxes to see that all parts are included. You will need a Phillips head and a flat head screwdriver. A power screwdriver or cordless drill is preferable. Ensure that the Phillips head fits neatly and fully engages the screw to avoid damage to the screws. Make sure that you tighten all screws securely and tap wooden dowels all the way in.

Use and Care

Your cabinet normally requires a minimum amount of maintenance; however, the following points are worth noting:

Cleaning - To remove marks and enhance the surface, wipe with general purpose cleaner.

Caution - Do not use ammonia-based cleaning agents. Do not use harsh chemicals or abrasive cleansers. The surface can be wiped with a damp cloth but should be dried quickly.

Electrical and Hydraulic Lifts - Require annual lubrication.

Understanding How the Cam Fastener Works

Screw cam bolts flush as illustrated.

Press cam into hole until flush with surface. The arrow direction must be in the direction of the hole!

Insert bolt through pre-drilled hole in edge of panel.

Turn clockwise to lock cam with bolt.
