EXCLUSIVE 365/24/7 SUPPORT PROGRAM

"Stahls' Hotronix® proudly offers extended support hours with our Blue Ribbon Support program. Speak with a live person 24 hours a day, seven days a week, 365 days a year!"

- Ben Robinson
Stahls' Hotronix® General Manager

Heat Printing apparel and accessories is faster and easier with the Heat Press Caddie™.

HEAT PRESS CADDIE™

The must-have Heat Press Caddie™ is an adjustable stand that converts any Hotronix® Auto Open or MAXX® Clam into a threadable heat press.

Threadability™ gives you the power to quickly and easily position garments on the lower platen and decorate the front, back or sides without removing it from the platen. This time-saving technique reduces the need for heat printing pillows or pads. Do the same job in about half the time and significantly increase production speed.

Self-leveling casters provide portability and stability, allowing you to take advantage of mobile heat printing opportunities.

Thread It!

Print It!

Spin It!

Adjustable up to 40" high

Increase Productivity Up to 40%

"The Caddie really speeds up the heat printing process. I wouldn't recommend buying a heat press without it."

Charm City Screen Print - Glen Arm, MD

"It speeds up production time. I buzzed through 200 shirts in 3 hours."

HEAT PRINTING TIPS

Decorate Apparel From Head to Toe

Print more than just T-Shirts and team uniforms. Bags, jackets, youth-sized apparel, and even shoes can be decorated with heat transfer products. Optional platens in various shapes and sizes make it all possible.

A Threadability™ Necessity

A Quick Slip Lower Platen Protector is a must-have accessory for threading your heat press. This fitted, non-stick cover slips snugly over the bottom heat press platen and allows you to effortlessly slide garments on to the lower platen.
