

Two push-buttons and a pedal are all that's required to take heat printing to the next level. The Hotronix® Air Fusion IQ® makes it all possible.

The upper platen locks down with accurate, even pressure and swings open automatically to create a heat-free workspace. A tap of the foot pedal returns the upper platen. It's that simple.

*Available in a Pedestal and Table Top model.*

**AIR-POWERED FOR EFFORTLESS OPERATION**

## **WORK SMARTER, NOT HARDER**

The Hotronix® Air Fusion IQ® combines the simplicity of an automatic heat press with the most technologically advanced product on the market. The patented Auto Adjust Pressure™ automatically adjusts to the thickness of the item you're printing, and you can program your time to change from pre-heating to final application. With up to four time and pressure settings, it's not just possible, it's automatic.

The Fusion IQ® controller gives you insight into your business you've never had. Check your job and operator performance, make proactive data-driven decisions in real time, and interact with your press any time, any where with its web-based portal. Its stored application instructions and self-diagnostic capabilities helps you work smarter not harder.

**AIR FUSION IQ® PEDESTAL**

**AIR FUSION IQ® TABLE TOP**

**PERFORMANCE**

- Auto open, auto swing operation
- Adjustable pedestal stand 37"- 44"\*
- Lockable casters\*
