

# Optional presserfeet for H | CLASS™ 100Q

## Invisible Zipper Foot

412 68 70-45

UTILITY GARMENT

An invisible zipper is always inserted before stitching the garment seam. The Invisible Zipper Foot has two grooves underneath the foot to accommodate the zipper coils and hold them in place as you stitch.

## Mini Piping Foot

413 18 30-45

DECORATIVE

Insert package piping into seams and edges for a tailored finish. Cover cord with fabric for specialty piping. The clear view allows you to see the piping placement and see exactly where you are stitching and enables you to see the first row of stitching and adjust your needle position to stitch next to the original row. Straight stitch, length 2.5.

## Interchangeable Dual Feed

920 21 90-96

QUILTING

The Interchangeable Dual Feed Foot with changeable presser feet is designed to feed layers of fabric and/or batting evenly. It is perfect for quilting, sewing velvet, stretch fabrics, imitation leathers and fabrics need precise pattern matching.

## Changeable 1/4" Guide Foot

413 23 83-45

QUILTING

Use the Changeable 1/4" Guide Foot for straight stitch and hand look quilt stitch. The guide will help you keep 1/4" (6mm) distance.

## Changeable Quilters Guide Foot

413 15 55-45

QUILTING

Use the Changeable Quilter's Guide Foot when stitching in the ditch along a seam line. The foot has guidelines to make it easy to accurately turn corners for 1/4 (6mm) or 1/8 (3mm) seams.

## Changeable Open Toe Foot

413 23 78-45

QUILTING

Use the Changeable Open Toe Foot when sewing Satin stitch applique, Taper stitches and Decorative stitches. The tunnel on the underside of the foot feeds smoothly and the open front gives greater visibility and a great overview of the stitches.

## Open Toe Free Motion Spring Foot

413 03 76-46

QUILTING

The Open Toe Free Motion Spring Foot gives clear visibility when doing free motion quilting or embroidery. Because of the open front, you can easily do stippling or follow a design in the fabric. The spring action keeps the fabric from lifting with the needle as the stitch is being formed

which helps eliminate thread breakage with specialty or heavier threads.
